EDUCATION

Bachelor of Science in Computer Science, University of Nebraska Lincoln
Minor(s) in Mathematics and Computational Biology and Bioinformatics (CBBI)

August 2018 - May 2022
GPA: 3.64/4.00

SKILLS

Languages R (tidyverse, Shiny, RMarkdown/Quarto), Python (pandas, seaborn, scikit-learn), SQL, ABAP, JavaScript, HTML, CSS

Technologies Git, GitHub, MySQL, VS Code, Tableau, Jira, Microsoft Office, SAP, Neptune DXP, Google Cloud Platform, BigQuery, Google Analytics, Looker Studio,

Familiarity with Apache Airflow, Docker, MS Azure, AWS (S3, EC2, Beanstalk)

Soft Skills Adaptability, Attention to Detail, Communication, Critical thinking, Learning Mindset, Organizational skills, Problem-Solving, Time Management, Teamwork

EXPERIENCE

Programmer Analyst/Developer
NeBIS, University of Nebraska System

December 2023 - Present
Lincoln, NE

- Developed and enhanced a suite of custom SAP SuccessFactors-integrated applications to support the position description lifecycle—enabling users to view, edit, import, and approve PDs system-wide; implemented routing features and side-by-side version comparisons to streamline approvals and improve hiring transparency.
- Built an application to view, create, and manage approval workflows for stock transfers and purchase orders, improving procurement operational efficiency and user experience.
- Delivered an ABAP solution for self-identifying disability status, enabling employees to update, notify, and generate a PDF form, helping to meet federal ADA compliance requirements.
- Designed a comprehensive reporting application to simplify employee information access and display for university-wide HR professionals, providing a user-friendly alternative to the PA20 transaction.
- Developed an organizational management change request application to update employee approvers individually or perform mass manager reassignments, with processing program, automated notifications, and reporting capabilities.
- Work closely with cross-functional teams of BASIS, HR, Payroll, Finance, and Procurement on business information systems tasks and projects, gathering requirements, testing, and training users.

Data Analytics Specialist
Nebraska Public Media

July 2022 - December 2023
Lincoln, NE

- Engineered and optimized data pipelines using Apache Airflow, Docker, Google Cloud, and Python, resulting in a 50% reduction in data processing time and enabling real-time data analytics.
- Developed an ETL data warehouse and archived Universal Analytics data using GCP; automated the station's monthly market audience estimate reporting dashboard with R, GitHub Actions, and Shiny.
- Collaborated with diverse teams on data-driven projects, developing research methodologies, executing data collections, and analysis, ensuring data confidentiality, and identifying KPIs.
- Produced dynamic reports and interactive presentations using RMarkdown and Shiny, integrating various datasets, conducting longitudinal trend analysis, and delivering actionable insights to leadership and stakeholders.

Software Engineering Associate
YAO Integrated Digital Omics Lab, UNL School of Computing

August 2021 - May 2022
Lincoln, NE

- Developed a bioinformatics web application to display and manage protein post-translational modifications data sets using Python-Django, CSS-Bootstrap, MySQL, and MongoDB database.
- Utilized pytest for unit testing, Selenium WebDriver for web UI testing, and pylint for code analysis.
- Implemented Continuous Integration and Deployment (CI/CD) using Travis CI and AWS EC2.
- Practiced Agile SDLC methodologies: participated in the daily scrum and sponsor meetings for requirements engineering, employed planning poker, documentation, peer programming, and code reviews.

Data Analyst Intern
Nebraska Public Media

August 2020 - May 2022
Lincoln, NE

- Automated institutional reporting for website/Facebook social engagement metrics using R, BigQuery, and Looker.
- Generated insights from diverse data sources, such as web, social media, survey data, audience ratings, and marketing databases, utilizing CSVs, APIs, Google Analytics, BigQuery, and R.
- Compiled reports and dashboards, performing regular and ad-hoc analyses and visualizations.

PROJECTS

Project Conduit: A data pipeline project focused on automating data extraction, warehousing, aggregation, analysis, and reporting for Nebraska Public Media.

Tech stack: Apache Airflow, Python, R, GCP, Google Data Studio, and many more.

New pyP3DB: A bioinformatics web application to host and display protein Post Translational Modification (PTM) data sets more comprehensively, and securely.

Tech Stack: Python-Django, CSS-Bootstrap, MySQL, MongoDB, AWS, Travis CI.

Super Bowl Data Analysis: This data science project delves into the Super Bowl, generating insights into game outcomes, viewership, and halftime shows. ([View here](#))

Tech Stack: Python (pandas, pyplot, seaborn), Streamlit

React Portfolio: A personal website developed using React, featuring a responsive design, modern user interface, and interactive sections showcasing skills, projects, and work experience. ([Visit me](#))

Tech Stack: React, Tailwind-CSS, yarn, Getform.io, Github Pages

INVOLVEMENTS

Data Literacy Cohort
PBS

January 2023 - August 2023
Remote

- Participated in monthly meetings aimed at enhancing data literacy among member media stations.
- Presented a group case study to a panel of data professionals.
- Attended workshops and PBS General Meeting conference 2023 hosted in San Diego.

Search Committee
Nebraska Public Media

October 2022
Lincoln, NE

- Evaluated applications for the Development Specialist and Digital Engagement & Fundraising Specialist position openings while maintaining confidentiality.

Student-Faculty Committee
CSE Student Advisory Board

September 2020 – September 2021
Lincoln, NE

- Addressed concerns of students and faculty within the College of Computing through biweekly meetings.
- Planned a new Peer Mentoring Program for the department.

Social Media Coordinator
Nepalese Student Association, UNL

April 2019 – March 2020
Lincoln, NE

- Managed email and social media accounts of the organization such as Instagram and Facebook.
- Organised and promoted events for the Nepalese community in Lincoln.

CERTIFICATIONS

- PBS: Data Management and Governance, Looker Studio
- DataCamp: Exploratory Data Analysis in R, Developing R Packages
- Google Skillshop: Google Analytics Certification, Advanced Google Analytics
- LambdaTest/Linkedin: LambdaTest Test Automation Professional Certificate
- Github/Linkedin: Career Essentials in GitHub Professional Certificate
- DataCamp: Intermediate Python, Introduction to Airflow in Python, Intro to Tableau
